

Add a squared and b squared to get c squared. Or, using a more mathematical approach: $a^2 + b^2 = c^2$

Add a squared and b squared to get c squared

$$a^2 + b^2 = c^2 \tag{1}$$

Einstein says

$$E = mc^2 \tag{2}$$

This is a reference to (2).

It's wrong to say

$$1 + 1 = 3 \tag{dumb}$$

or

$$1 + 1 = 4$$

Again...

$$a^2 + b^2 = c^2$$

or you can type less for the same effect:

$$a^2 + b^2 = c^2$$

or if you like the long one:

$$a^2 + b^2 = c^2$$

In text: $\lim_{n \rightarrow \infty} \sum_{k=1}^n \frac{1}{k^2} = \frac{\pi^2}{6}$.
In display:

$$\lim_{n \rightarrow \infty} \sum_{k=1}^n \frac{1}{k^2} = \frac{\pi^2}{6}$$

$f''(x)$

In display style:

$$3/8 \qquad \frac{3}{8} \qquad \frac{3}{8}$$

In text style: $1\frac{1}{2}$ hours $1\frac{1}{2}$ hours

Pascal's rule is

$$\binom{n}{k} = \binom{n-1}{k} + \binom{n-1}{k-1}$$

$\neq \leq \geq \approx \neq \leq \geq$

$$f_n(x) \overset{*}{\approx} 1$$
